

**Order a Vitrek Hipot Tester and get
FREE TL-115x
NEMA 5 Test Adapter Lead Set!**
Up to a \$250 Value! Only until March 31, '26.

VitreK Hipot and Electrical Safety Testers provide ultra-low leakage measurement down to 100 pA with precise, stable DC voltage for accurate insulation and safety testing. Built for demanding applications and Made in the USA.

TL-115X NEMA 5 POWER SOCKET TEST ADAPTER LEAD SET

TL-115x Test Adapter Lead Sets are compact accessories designed for seamless use with Vitrek's hipot electrical safety testers and are available in two configurations to match different testing needs.

The TL-115-1 provides a standard 115 V NEMA 5-15 power-socket interface for efficient dielectric (hipot) testing of corded devices, while the TL-115-2 adds integrated ground bond test capability, allowing both tests to be performed using a single adapter set. The TL-115-3 allows for ground bond testing only. Together, they enable quick, repeatable connection of devices under test (DUTs) without custom fixtures, improving efficiency in production and lab environments.

Key Applications

- **Standard 115 V Power Connectivity** – Accepts common North American power cords for fast, repeatable safety testing.
- **Efficient Test Interface** – Direct adapter connection simplifies setup and improves test consistency.
- **Integrated Ground Bond Support (TL-115-2)** – Enables combined hipot and ground bond testing without changing accessories.

Ideal for environments where accuracy and convenience matter:

- **Production Testing** – Reduces setup time for high-volume safety testing of corded products.
- **Compliance & QA Labs** – Provides a clean, repeatable interface for certification and validation testing.
- **Streamlined Safety Workflows** – Eliminates custom fixturing, helping operators test faster with fewer connection errors.
